PROFILE

Passionate Software Developer with expertise in JavaScript, Python, MERN stack, . Experienced in building scalable web applications, automation tools, and AI-powered solutions. Strong background in backend development, API integrations, and authentication systems. Committed to delivering efficient, secure, and user-centric applications.

PROJECTS

Chat Application

NOV - DEC 2024

MERN Stack + Socket.io

- Developed a real-time chat application using the MERN stack, integrating Socket.io for instant messaging and JWT authentication for secure user access.
- Implemented group chat functionality, online status indicators, and message read receipts, enhancing user engagement and communication.

Inventory Management System

Jan -Feb 2025

Nodejs + MongoDB

- Designed and developed an inventory management system with real-time stock tracking, automated stock level alerts, and role-based access control.
- Implemented a RESTful API with Express.js, allowing seamless CRUD operations, order management, and data visualization using charts and reports for business insights.

Job Portal

Dec -2024- Jan 2025

MERN Stack

- Built a job portal with role-based authentication, job posting, application tracking, and an admin dashboard for managing job listings.
- Integrated search and filtering features, resume uploads using Multer, and email notifications, streamlining the hiring process for recruiters and job seekers.
